

MTR Research Funding (MRF) Scheme Supplementary Information – Tips on Proposals

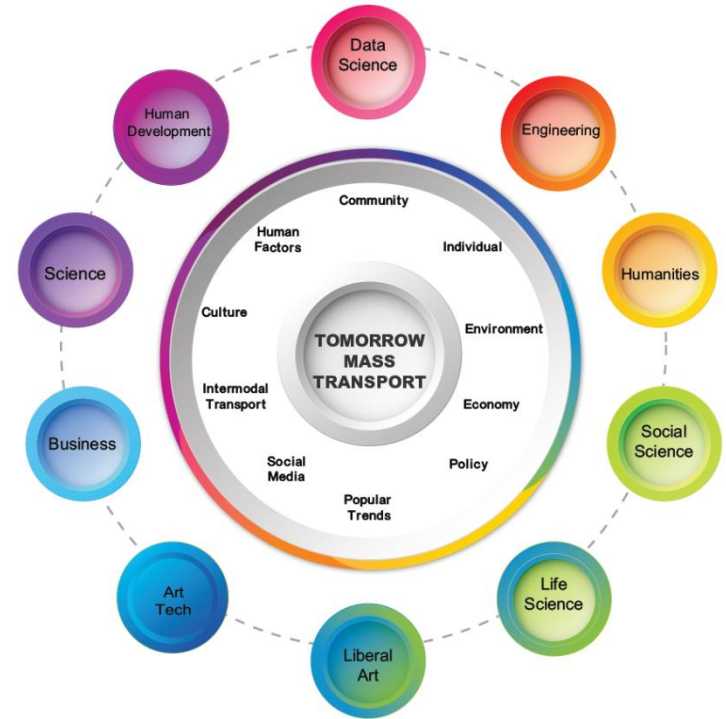

MRF Objectives

Invite **exploratory research** to

- Envision and shape the future rail transport for our society
- Anticipate demand and expectation of such transport provision
- Offer solutions to or studies on potential problems

Proposals are expected to

- Look well beyond current problems, constraints and data
- Define the future rail transport system performance, commuting experience, business models, community integration, social impacts etc
- Explore and investigate the challenges for the society, operator, individuals, environment, economy etc
- Put forward innovative solutions to tear into the challenges
- Come from all disciplines of research
- Contain little or no background IP

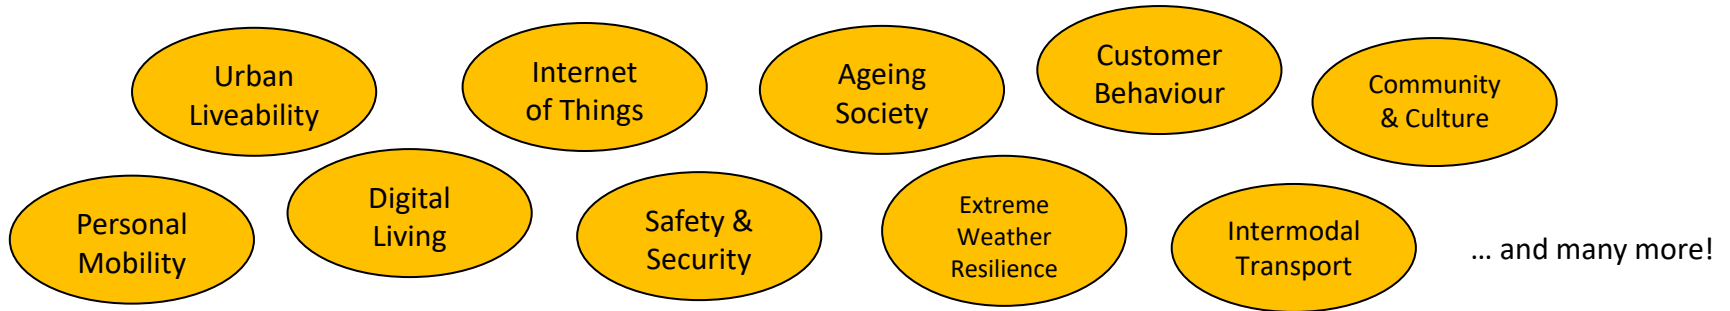

Themes for 2023 call for proposals

- Environmental, Social and Governance (ESG) for Metro/ Rail Operators
- Post-pandemic Public Transport
- Smart Community/ Real Estate Management

Points to note:

- The themes are focal points to provoke thoughts and stretch imagination
- They are meant to be broad and inclusive for all disciplines of research

They can be connected to various topical areas

Data Access

MTR Academy does not have access to the system and operation data of MTR. Proposals should not assume any provision of data from MTR even if they are granted.
